Summary:

My interest in software engineering was sparked when I built my first website at my job as a digital marketing specialist. I believe that programming is one of the most versatile and important skills a person can acquire. Once you have that skill you can build almost anything.

Skills:

HTML5, CSS, SASS, SCSS, Javascript, Python, MongoDB, MongoDB Atlas, Mongoose, Django, Node.js, Express, Postman, Heroku, PostgreSQL, React, Git, GitHub, AWS, Adobe Creative Suite (Photoshop, Illustrator, Etc.), Sketch, Wireframing, Trello, Lucidcharts, Outreach, Research, Teamwork, Programmatic Thinking, Marketing, & More

Projects:

Steed Finder - <https://github.com/davesheinbein/steed-finder-horse-bulliten-board/blob/master/README.md>

This is a marketplace for people to list horses and connect to potential buyers via contact information.

Technology: HTML5, CSS, Javascript, Mongoose, MongoDB, MongoDB Atlas, Node.js, Express, React, Heroku

Twists Of Rate - <https://github.com/davesheinbein/TwistsOfRate>

Video game rating and review website built as a group project with 3 contributors using an API and CRUD.

Technology: HTML5, CSS, Javascript, Python3, Django, PostgreSQL, GitHub, Heroku, Materialize, AWS, Postman

Inspirations Website - <https://github.com/davesheinbein/full-stack-web-app>

A Gif and Video website that allows people to upload Gifs & Videos, leave comments, and favorite uploads.

Technology: HTML5, CSS, Javascript, Mongoose, MongoDB, MongoDB Atlas, Node.js, Express, Postman, Heroku

War Game - <https://github.com/davesheinbein/War-game>

War card game. Allows players to play a card game against a computer at the click of a button.
